

Art Deco Project Part 3

In your sketchbook, create 3 thumbnail sketch ideas for an Art Deco/Streamline appliance, tool, or vehicle. Your design must be based on a real life pre-existing item (not fictional).

Turn in to Mr. McCray for a daily grade

In Illustrator, create a detailed rendering of your design. Use gradients and the mesh warp tool. You may choose to find other photographic resources to help you render your object or vehicle.

Once you have fully rendered your object, create a simple 11 x 17" deco poster advertisement for your product. On the poster, include the name of your product and a short paragraph describing what it does or what it is about.
