

Are you have issues with your programs not showing up in the Software Center?

Try the following...

Go to Search Windows and type "Configuration Manager"

Click Configuration Manager control panel.

When the Configuration Manager Properties Window opens, click on the "Actions" tab

Next, click on the "Software Inventory Cycle" and click "Run Now".

-wait

Click on the "Software Update Scan Cycle" and click "Run Now".

If these do not work, click on the following...

"User Policy" and click "Run Now".

Lastly, try clicking on the following

"Machine Policy Retrieval & Evaluation Cycle" and click "Run Now".
