

Timeline – Design 4

Make a list of the significant times in your life. This list can be made of happy things, sad things, or things that may have had a tremendous impact on you which you did not necessarily experience in person.

Reflect on how you could represent each element visually, by texture, color, object, etc. Look for relationships between your experiences (objects, etc.). How are they alike? How are they different?

Look for a solution for your design that will bring most or all of your elements together. Can you fill in the following response using one or two words? “My timeline is a(n) _____.”

Create your final document. The size of your document should be at least 11” x17”.

Communication is important! Your poster should not be ambiguous. Be sure the viewer knows exactly what your design is about. Include **typographic information explaining each element on your timeline.**
